

# Melvin U. Gungog

## Backend Engineer | Cloud & Event-Driven Systems

Cebu, Philippines | wuweimelvz@gmail.com | +63 995 647 3431 | linkedin.com/in/melvin-gungog-95040327b | iammelvz.github.io/portfolio

---

### PROFESSIONAL SUMMARY

Backend-focused software engineer with 9+ years of experience building scalable, event-driven systems for high-traffic e-commerce platforms. Currently a Backend Engineer at an Australian e-commerce company (Pet Circle), contributing to fulfillment and warehouse management services on Google Cloud Platform using Java Spring Boot, Node.js, and TypeScript. Solid expertise in Pub/Sub architecture, microservices, Commercetools, and cloud-native tooling (Cloud Run, Cloud Functions, BigQuery). Proven track record of delivering production systems that handle real-time order processing and logistics automation. Open to backend or full-stack engineering roles in Singapore, Canada, or New Zealand.

---

### PROFESSIONAL EXPERIENCE

#### Mid-Level Backend Engineer

Pet Circle (Australian E-Commerce) | Remote — Philippines | Jun 2022 – Present

- Architected and maintained event-driven fulfillment microservices using Java Spring Boot, Node.js/TypeScript, and GCP Pub/Sub
- Engineered a dual-capacity fulfillment model optimizing both fulfillment center and courier constraints, enabling more accurate delivery promise calculations across the platform
- Built and maintained warehouse management services covering the full order lifecycle: order-confirmed → picked → packed → dispatched → delivered using Java Spring Boot and Node.js/TypeScript
- Developed a Cloud Function-based delivery code update pipeline integrated with Commercetools, handling real-time order routing and fulfillment state transitions
- Designed and documented technical architecture (v4.0) for capacity forecasting, including audit trail capabilities and Mermaid-based architecture diagrams
- Integrated Braze for customer communication workflows including shipping notifications and delivery updates
- Led backend work with BigQuery for data warehousing, analytics queries, and operational reporting dashboards
- Implemented alerting, monitoring, and GCP Logging policies to ensure system observability and SLA compliance
- Collaborated with cross-functional teams (product, data, DevOps) in an Agile/Scrum environment using JIRA and Confluence

#### Full Stack Developer

Fujitsu Global IT Services and Solutions | Cebu City, Philippines | Feb 2021 – Apr 2022

- Developed enterprise-grade web applications using Java (x33 Framework), JSP, and OracleSQL for Japanese enterprise clients
- Performed backend optimization and unit testing (JUnit4) in a structured Waterfall delivery environment
- Collaborated in cross-cultural engineering teams adhering to strict documentation and quality standards

#### Full Stack Developer

Cazoomi (San Francisco, CA — Remote) | Philippines | Jan 2018 – Dec 2020

- Built and maintained bi-directional sync integrations between major CRM platforms (Salesforce, HubSpot, Zoho, MS Dynamics 365) and ESPs (Mailchimp, Constant Contact, ActiveCampaign)
- Developed backend services in Java (Play Framework) with ArangoDB and Memcached for high-performance data synchronization pipelines
- Provided Tier 3 technical support, diagnosing complex integration failures across customer CRM/ESP environments

#### Application Support Specialist

Metro Retail Stores Group Inc. | Mandaue City, Philippines | May 2016 – Jan 2018

- Built desktop automation tools using Java and PHP, reducing manual processing time for Oracle Retail operations
- Managed Oracle Retail applications (POS, ReSA, RMS, EBS Ledger) and provided Tier 2 support across store systems

## NOTABLE PROJECTS

**Serenity — Mental Wellness App** (React Native / Expo, TypeScript, Supabase, Anthropic AI SDK)

- Full-featured mental wellness mobile app with 37+ screens: mood tracking, AI-powered journaling, therapeutic breathing exercises, habit tracking, and premium PayPal subscription tier

**Kabisado — Civil Service Exam Prep App** (React Native, Expo, TypeScript, NativeWind)

- Offline-first mobile reviewer app targeting the Philippine Civil Service Exam market, featuring gamified quizzes, streak tracking, and freemium monetization model

## TECHNICAL SKILLS

|                   |                                                                                                           |
|-------------------|-----------------------------------------------------------------------------------------------------------|
| Languages         | Java (8/11/17), TypeScript, JavaScript, SQL, Bash                                                         |
| Backend           | Spring Boot, Node.js, NestJS, Express.js, REST APIs, GraphQL                                              |
| Cloud & Infra     | Google Cloud Platform (Pub/Sub, Cloud Functions, Cloud Run, BigQuery, GCS), Docker, CI/CD, GitHub Actions |
| Databases         | PostgreSQL, MySQL, BigQuery, OracleDB, ArangoDB, Redis, Supabase                                          |
| Frontend          | React, Next.js, React Native (Expo), TypeScript, Tailwind CSS, Vite                                       |
| Tools & Practices | Commercetools, Braze, JIRA, Confluence, Postman, Swagger, Agile/Scrum, Technical Design Docs              |
| AI / Integrations | Anthropic Claude API, Gemini API, ElevenLabs, Supabase Auth / Edge Functions                              |

## EDUCATION

**Bachelor of Science in Information Technology**

Cebu Institute of Technology – University | 2012 – 2016

## ADDITIONAL INFORMATION

**Availability:** Available for relocation to Singapore, Canada, or New Zealand

**Languages:** English (professional proficiency), Filipino (native)

**Work Authorization:** Philippine passport holder — actively seeking employer-sponsored visa (EP / AEWV / LMIA)
